Valued-Based Capitation Reimbursement Models

Compared to a traditional fee-for-service model...

Traditional Fee-for-Service Model

Siloed care with little coordination among providers

Volume-based system results in redundant, contradictory care

Limited integration and data sharing

Reactive care

Little sensitivity to cost

Poor patient experience

Tech-powered value-based care

technology-powered platform to deliver value-based care through our horizontally and vertically integrated physician-centric model.

Value-Based Care Model

Integrated healthcare ecosystem

Reduce redundant and/or unnecessary testing

Actionable data allows providers to make informed decisions

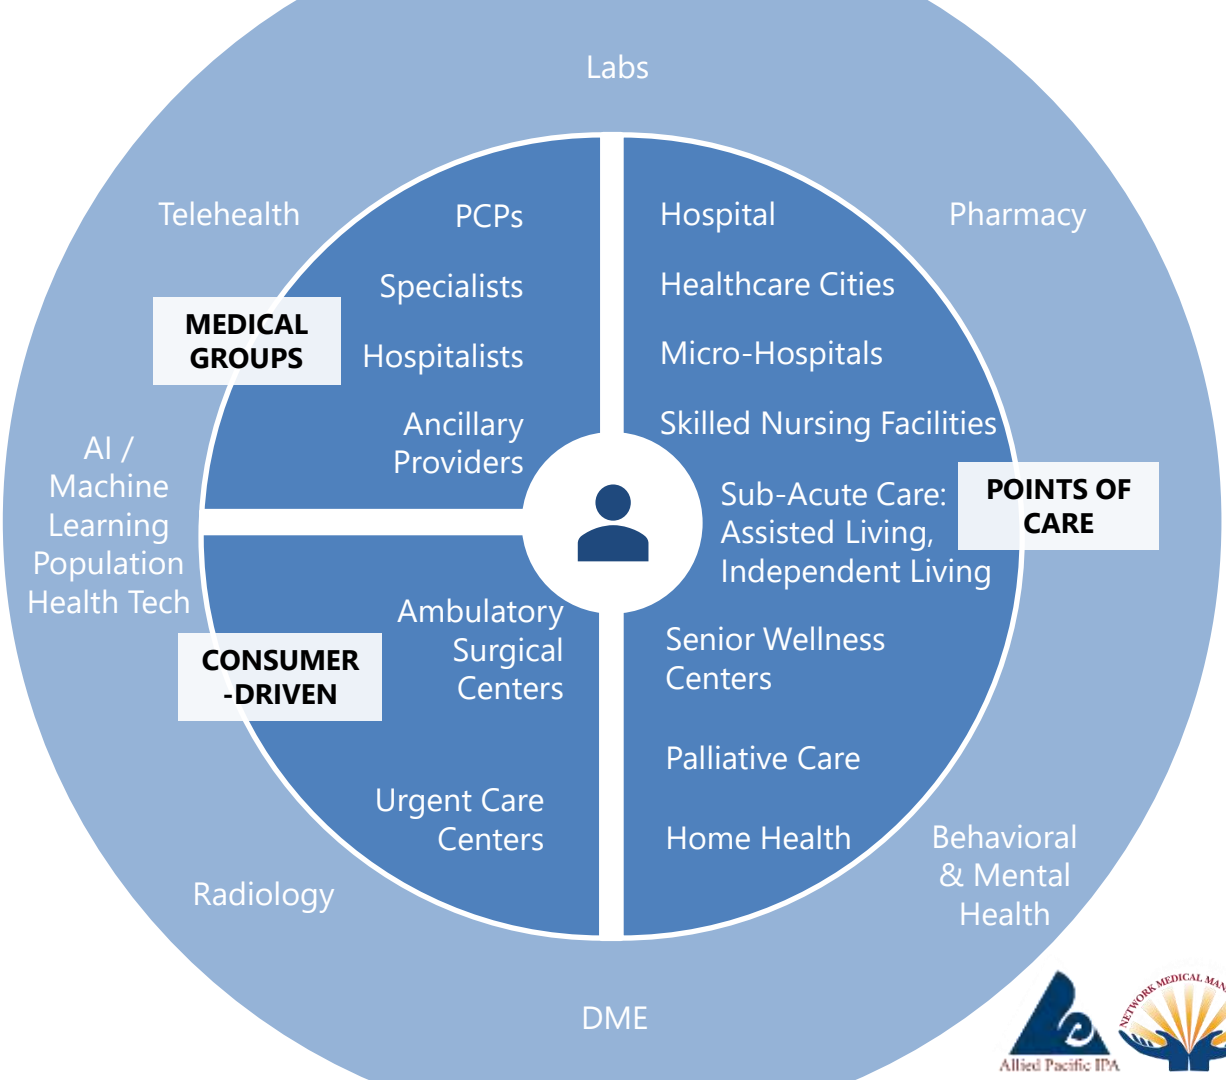

Emphasize preventative/chronic care management

Incentive to deliver better care at lower cost

Improved patient experience and outcomes

Next-generation integrated healthcare platform is centered around the **patient**.

Value-Based Care Model Benefits all Stakeholders

PATIENTS

- Improved health outcomes
- Improved patient experience
- Reduced out-of-pocket expenses for patients

PAYORS

- Improved population health and higher quality scoring
- Increased membership
- Significant savings (capitation arrangements align financial incentives with proactive and preventative healthcare)

PROVIDERS

- Reduced burn-out by relief of administrative burden
- Customized technology-powered clinical support
- Spend more time engaging with patients.
- Compensation driven by quality.
- Avoid unnecessary interventions and keeping patients out of the hospital.

PARTNERS

- Increased utilization at in-network & partner's facilities
- Focuses care in the most cost-effective setting while enabling ApolloMed and hospital partners to share in risk pool dollars

Thank You!
